

## GESIPA® - Tool Maintenance Training

### Training Overview

---

Training at your premises is for up to 4 people per session, per day  
Virtual training is unlimited people per session, per day

Both options to include the following:-

Explanation of the parts and operating features of the tool

Stripping and re-building the tool - as per training session booked below

Replacing hydraulic oil and bleeding the tool (if applicable)

General fault finding

Q&A

\*It is recommended that if you have any tools on site that may not be working correctly these can be used for fault finding exercise.

Once the GESIPA tool training has been completed a good understanding of the tool will have been gained. With this new knowledge of the GESIPA tooling it means repairs can be done in house, greatly reducing external repair centre service and carriage charges and most importantly, it will keep the production and tool downtime to a minimum.

### Pricing

---

£350 per session for training at your premises (front end maintenance training and full strip down tool training)

Part Number: 1575933

£200 per session for virtual training (front end maintenance training)

Part Number: 1575933
