

OUR TRAINING PACKAGES

ACCUBIRD | POWERBIRD | TAURUS

Preventative Maintenance Training

Our front-end maintenance training package provides a generalised overview of your GESIPA® tools including the stripping and re-building of front-end parts.

Includes:

- Training for up to 4 people per session
- Explanation of how the tool works
- Walk-through of the front-end parts and operating features of the tool
- Stripping and re-building of the front-end
- Quick oil change and bleed procedure of the tool (if applicable)
- General fault finding
- Q&A
- GESIPA training certification

TAURUS | FIREFOX

Full Maintenance Training

Our full maintenance training package provides attendees with extensive knowledge of their GESIPA® tools. This covers everything found in the front-end maintenance training package as well as:

- Full strip down and rebuild of the tool along with oil filling and bleeding procedure (if applicable)
- Explanation of all seals, gasket, plungers, etc.
- 2 x hydraulic and pneumatic seal service kits (Taurus or FireFox only), to be left with customer for servicing tools at own convenience – **RRP £240**

If you have any tools on-site that may not be working correctly, it is recommended to use them for fault-finding exercises during the full maintenance training sessions.
